

Name _____ Date _____

Ch 7 Marine Invertebrate Vocabulary

Mrs. Peck

kingdom animalia

vertebrate

invertebrate

sponges

sessile

suspension feeders

filter feeders

plankton

spicules

spongin

pinacocytes

porocytes

ostia

choanocytes

collar cells

amebocyte

osculum

asexual reproduction

sexual reproduction

gametes

spawning

cnidarian

radial symmetry

oral surface

aboral surface

polyp

medusa

tentacles

gut

epidermis

gastrodermis

mesoglea

bilateral symmetry

anterior

posterior

dorsal

ventral

proboscis

segments

parapodia

setae

gills

deposit feeders

suspension feeding

filter feeding

passive suspension feeding

molluscs

mantle

foot

radula

chiton

mantle cavity

siphon

byssal threads

fouling organism

ink sac

pen

crystalline style

open circulatory system

closed circulatory system

ganglia

hermaphrodite

exoskeleton

molt

crustacea

antennae

carapace

cephalothorax

abdomen

scavengers

maxillipeds

compound eyes

statocyst

pentamerous

oral

aboral

endoskeleton

water vascular system

tube feet

ampullae

madreporite

ambulacral grooves

pedicellariae

evisceration

coelomic fluid

coelom

regeneration
